CHANGES, AND MORE CHANGES

The familiar SMSA, or Standard Metropolitan Statistical Area, has been replaced by the new term MSA, Metropolitan Statistical Area. Geographical area changes accompanied this renaming in two Colorado areas. The former Denver area was split into two MSA's: the Denver MSA containing Adams, Arapahoe, Denver, Douglas and Jefferson Counties and the Boulder-Longmont MSA consists only of Boulder County. Gilpin and Clear Creek Counties were removed and are now independent areas. The Colorado Springs SMSA, El Paso and Teller Counties, is now the Colorado Springs MSA consisting of El Paso County only. Teller County is now an independent area. Single-county name changes for Colorado's three other MSA's were introduced last year.

Labor force statistics for the period 1983-85 have been revised to reflect area changes, 1980 Census relationships for residency adjustment and agriculture and the 1985 Current Population Survey results. Industry employment data has been benchmarked to March 1985 employer reports.

1985 LABOR MARKET DEVELOPMENTS

While the national economy continued to improve throughout the year albeit at a slower pace than in 1984, the Colorado economy suffered from the lingering effects of numerous high-tech layoffs and weakness in several of its industries. National unemployment averaged 7.2 percent in 1985, down slightly from the 7.5 percent rate recorded in 1984 The U.S. economy generated over 2.1 million new jobs during the year. This was only one-half of the nearly 4.1 million added in 1984, however,

The Colorado economy turned in a sluggish performance during 1985 with the unemployment rate in the State rising to 5.9 percent from 5.6 percent in 1984. Unemployed Coloradans numbered 101,000 over the year, up 4,000 from one year earlier. Total employment in the State managed to gain only 2,000 to 1,619,000. Large layoffs at Storage Technology and MiniScribe in late 1984 and the first few months of 1985 set the tone for the entire year.

The basic sectors of mining (- 3,000), construction (- 4,300) and durable goods manufacturing (- 2,700) all lost jobs in 1985.

Retail trade (+ 7,500), finance, insurance and real estate (+ 3,000) and services (+ 12,000) enjoyed reasonably good growth.

Signs of improvement in the growth prospects of semiconductors and its related sectors have begun to emerge. The industries book to bill-ratio has risen for several months indicating that the chances for a turnaround in the industry is excellent. The general health of Colorado computer firms is also beginning to improve as we enter the new year.

A near term negative, however, is the collapse in the world price of oil from $30 per barrel in December to $11 recently. This development has hurt several Colorado energy firms. Both Atlantic Richfield and Phillips Petroleum have cut back their Denver operations by a total of 500 workers and Stearns Catalytic of Denver has announced that it may have to lay off half of its 2,000 Denver workforce if its contractual energy business doesn't improve soon.

* Due to rounding, sum of individual items may not equal totals. Estimates include all full-time or part-time wage and salary employees who worked or received pay during the week including the 12th of the month. Nonagricultural self-employed, unpaid family workers, and domestics are excluded. Estimates based on March 1985 benchmark utilizing 1972 Standard Industrial Classification Coding. Estimates are not seasonally adjusted. Data compiled in cooperation with the U.S. Department of Labor, Bureau of Labor Statistics. Other categories within industry series have not been validated by BLS although they are derived from the same source.

* Due to rounding, sum of individual items may not equal totals. Estimates include all full-time or part-time wage and salary employees who worked or received pay during the week including the 12th of the month. Nonagricultural self-employed, unpaid family workers, and domestics are excluded. Estimates based on March 1981 benchmark utilizing 1972 Standard Industrial Classification Coding. Data compiled in cooperation with the U.S. Department of Labor, Bureau of Labor Statistics.

* Due to rounding, sum of individual items may not equal totals. Estimates include all full-time or part-time wage and salary employees who worked or received pay during the week including the 12th of the month. Nonagricultural self-employed, unpaid family workers, and domestics are excluded. Estimates based on March 1981 benchmark utilizing 1972 Standard Industrial Classification Coding. Data compiled in cooperation with the U.S. Department of Labor, Bureau of Labor Statistics.

* Prepared by the Colorado Department of Labor and Employment. Averages are based upon data for full and part-time production and related workers, including the nonsupervisory employees and working supervisors who were employed during the pay period including the 12th of the month. These average earnings are computed on a "gross" basis and may reflect changes in premium pay for overtime and late shift work as well as changes in basic hourly and incentive wage rates. Average hourly earnings are not wage rates but are averages of gross earnings of all employees below the administrative level.

* Prepared in cooperation with the Bureau of Labor Statistics. Averages are based upon data for full and part-time production and related workers, including the nonsupervisory employees and working supervisors who were employed during the pay period including the 12th of the month. These average earnings are computed on a "gross" basis and may reflect changes in premium pay for overtime and late shift work as well as changes in basic hourly and incentive wage rates. Average hourly earnings are not wage rates but are averages of gross earnings of all employees below the administrative level.

* Labor Market Area includes Adams, Arapahoe, Boulder, Clear Creek, Denver, Douglas, Gilpin, and Jefferson Counties.

** Prepared in cooperation with the Bureau of Labor Statistics. Averages are based upon data for full and part-time production and related workers, including the nonsupervisory employees and working supervisors who were employed during the pay period including the 12th of the month. These average earnings are computed on a "gross" basis and may reflect changes in premium pay for overtime and late shift work as well as changes in basic hourly and incentive wage rates. Average hourly earnings are not wage rates but are averages of gross earnings of all employees below the administrative level.
